

Fig. 1 is a perspective view of a multi-layered material. It features a central layer (7) with a wavy pattern (6) on its surface. The material is supported by rollers (8a, 8b) and has a thickness dimension 'a' indicated.

[Fig. 7]

[Fig. 8]

Figure 1 consists of three scanning electron micrographs (SEM) labeled (a), (b), and (c), showing the surface morphology of polyimide films. Image (a) shows a smooth surface with a scale bar indicating 50 μm . Image (b) shows a surface with vertical ridges and grooves. Image (c) shows a surface with a grid-like pattern of ridges and grooves. Each image has a date stamp in the bottom left corner: (a) 20x0, (b) 20x0, and (c) 20/DEC/94.
